

Dr. Ofra Axelrod

Dr. Axelrod is the Director of the Institute for Standardization and Control of Pharmaceuticals and Deputy Head of the Pharmaceutical Division where she is responsible for marketing authorization of medicinal products and compliance of quality issues. The Institute for Standardization and Control of Pharmaceuticals is responsible for evaluating the quality of medicinal products (drugs, biologicals and advanced therapies) along the entire lifecycle, including GMP inspection, laboratory analysis, quality defects and complaints. The registration department under her supervision is responsible for safety and efficacy evaluation and marketing authorization.

In 1997, Dr. Axelrod has established the Unit of Quality Assessment of Biological Products in the Institute for Standardization and Control of Pharmaceuticals.

Dr. Axelrod holds a PhD in Immunology from the Weizmann Institute of Science and was involved in immunological research at various research institutes in Israel and USA.
