

### **Dr. Milton Bonelli**

Dr. Bonelli is the current head of the Clinical Pharmacology and Non-Clinical support office at the European Medicines Agency (EMA).

Before joining the Agency, his research activity, mostly in the field of molecular oncology and stem cells, focused on the use of patient-derived tumor samples for the development of drug screening assays, both for small molecules and radiopharmaceuticals.

Since joining the EMA in 2011, he has worked in the non-clinical and clinical pharmacology area providing scientific analysis and support for initial Marketing Authorization and Scientific Advice procedures as well as input in other early drug development support initiatives of the EMA.

He is a Doctor in Medicine (University of Rome Sapienza) specialised in clinical pharmacology and has published various articles accounting for his professional and research activities.
